University's Budget Woes to be Alleviated

The University of Alberta will receive an additional allocation for the current budget year.

President Myer Horowitz told the 8 July meeting of the Board of Governors of his meeting the previous day with Advanced Education Minister Dave Russell. "I know enough about the details to know that our minister was a very strong advocate (in Cabinet) for us," he told the Governors. While not yet aware of the amount of money that the University will receive, Dr. Horowitz was optimistic that, "at the absolute minimum," the sum would look after the current deficit of \$2.5 million.

"The details will come soon enough," he said.

The President also announced that under the University's Support Staff Job Evaluation Study (Equal Employment Opportunity Initiatives) no individual will have his/her pay reduced. And, effective 1 April 1989, there will be a "major adjustment" in the salaries paid to about one-third of the non-academic staff. "We're doing it because we think it's the right thing to do, not because we're under pressure from any quarter," Dr. Horowitz said.

While he exacted a measure of satisfaction from these developments, the President was

visibly moved by the death of J. Gordin Kaplan. "Perhaps the most important thing that can be said about him is that he made a difference . . . and you can't say that about everybody. The University benefited from his imaginative proposals. He stimulated us to move courageously from where we are to where he knew we need to go."

Dr. Kaplan will be remembered in many ways, one of which is the J. Gordin Kaplan Postdoctoral Fellowships. Dr. Horowitz announced that, effective in 1989-90, a trio of postdoctoral fellowships will be financed from the income of gifts to the

Telephone Registration System Gets Ringing Endorsement

The University of Alberta entry "Student Registration By Telephone" won an Honourable Mention at the first Canadian University Productivity Awards Program.

"Using touch-tone telephones," reads the awards program brochure, "students can now

register in courses by linking directly with the university's records data base. In addition to saving staff and students valuable time, the technology has resulted in improved service and management information and greater course choice and availability."

The system is the first of its kind in Canada.

Vice-President (Administration) Allan Warrack accepted the award at the Canadian Council for the Advancement of Education conference in Saskatoon last month.

University of Alberta

University that aren't marked for a particular purpose. One fellowship will be in the humanities and social sciences, another in the natural sciences and engineering, and the third in the medical sciences.

Dr. Horowitz called the fellowships "an appropriate and lasting memorial to Dr. Kaplan."

Chancellor Tevie Miller conveyed the news that in late June the Senate's honorary degrees committee had chosen Dr. Kaplan to receive an honorary degree at Fall Convocation. That degree will be accepted by a member of Dr. Kaplan's family.

Presidential Search Committee

John Schlosser, chairman of the Presidential Search Committee, said that a small sub-committee had been struck to review applications and ensure that any that go forward to the main committee jibe with the guidelines set by that committee.

Janet Wright, a consultant with George Enns Partners Inc. of Toronto, was retained by the committee at its May meeting. Dr. Wright sat down with the committee in June and will return for the next meeting, 4 August.

Other Matters

The Board approved the disbursement of an amount not to exceed \$1,500,000 for the refurbishing of HUB Mall. The focus will be "the middle area, the area that most people see," said Jack Scott, chairman of the Building Committee.

HUB Mall was built in 1972-73 by the Students' Union and acquired by the University in 1976.

A discussion of development strategy concerning the proposed parkade at Lister Hall took note of the estimated cost of \$12 million (\$8 million to the University, \$4 million to the Alberta Cancer Board). It is intended that the 800-stall facility (two or three levels) be constructed under the playing field at the Lister complex.

GFC Completes Business for Another (Academic) Year

On 27 June, General Faculties Council concluded the 1987-88 academic year by welcoming new members, receiving reports and considering and voting on action items.

New Members

Graduate Students' Association representatives to GFC are M. Boyce, M. Brown, J. Buolamwini, T. Dearman, A. Eisenhauer, C. LeRoy, L. Russell and L. Strang. Their terms will run to 31 March 1989. Also made welcome by Council were J. Bertie, president-elect of the Academic Staff Association, and C. Dechaine, the NASA representative.

Reports

In the GFC Executive Committee report, President Horowitz outlined some of the committee's responsibilities and explained that it acts for GFC on urgent matters during Council's summer recess. The Executive Committee, he added, has never used this power because it felt that the matters could be delayed

until the resumption of regular GFC meetings in September.

The development of the Timms Collections Centre is one of the major items on the Facilities Development Committee agenda, according to Allan Warrack, Vice-President (Administration).

The Academic Development Committee is concerning itself with such issues as a common first year of study and a change to teaching evaluations, Peter Meekison, Vice-President (Academic), reported. Meanwhile, the Planning and Priorities Committee is thrashing out details for next year's budget, Dr. Horowitz said.

The meeting marked the first time that the Research Policy Committee reported to GFC. Brian Scarfe, Associate Vice-President (Research), noted that the committee has established terms of reference for itself and investigated ways of recovering the indirect costs of research.

New Business

GFC endorsed a recommendation from its Undergraduate Scholarship Committee which calls for the

consideration of annual awards and endowed bequests on a case-by-case basis. The Department of Physical Education and Sport Studies received approval to establish a quota of 105 first year students and at least 30 additional students in the third year (maximum of 135 third year students). A sister department, Recreation and Leisure Studies, also received GFC approval for a quota of 80 students in the first of

three years and at least 25 additional students in the following year resulting in a maximum of 105 third year students (the department admits students only after they have completed one year of general University study). Admission changes and changes in stand of promotion in undergraduate degree programs in both departments were also upheld by Council. The changes take effect on 1 September.□

Is University Video Popular? You Can Bet(a) on It

The President, the Chancellor and the director of Alumni Affairs don't leave home without it. Faculty and Senate members are taking their cue from this trio and a number of students may follow suit.

"In Pursuit of Excellence," an 18-minute video on the University of Alberta, is a suitcase staple for Myer Horowitz, Tevie Miller, Susan Peirce and other roving ambassadors.

"We experienced real success with that video. It's proving to be an excellent aid," Dr. Horowitz noted at last month's meeting of Senate. He was referring to the first gathering of U of A alumni in Fort McMurray.

Chancellor Miller calls the video "an excellent graphic display of what's going on at the University."

Ms. Peirce has shown the video at recent alumni branch meetings in Kelowna, Victoria, Fort McMurray, London (Ontario), and New York and has found that it really brings the campus home to people. "There's some facet about it that twigs everybody . . . that's its strength."

The main ingredients of "In Pursuit of Excellence" are computerization, living and learning elements, material related to the planning document "The Next Decade and Beyond" and the research component. The content was chosen by a committee made up of Brian Silzer (Registrar), Al Squibb (Public Affairs), Dan Kaufman (CFRN) and Ms. Peirce.

The video (it comes in both VHS and Beta) can be borrowed at no cost or it can be purchased for \$12.95. The loan/purchase agent is the Office of Alumni Affairs.

Ms. Peirce says plans call for a video to be updated annually. The committee also wants to explore the possibility of producing other specifically-directed videos, for example, student recruitment, she says.

"In Pursuit of Excellence" was made possible by the generous support of G.A. Rice, president of Sunwapta Broadcasting, and a grant from the Alma Mater Fund. The video will be shown on CFRN TV on Friday, 2 September, at 7 p.m.□

Molson Health Research Award Resides in Faculty of Medicine

The University of Alberta is this year's recipient of the Molson Health Research Award in Health Care Evaluation.

It is interesting to note that the University was selected to receive the \$35,000 award a few years ahead of schedule because of the Advanced Education Endowment and Incentive Fund, says Hal Spelliscy, executive director, Development Office. "This is

additional proof of the high regard donors have for this province's excellent incentive plan," he adds.

The award will be administered through the office of the Dean of Medicine, Douglas Wilson.

Harley Deeks, president of Molson's Alberta Brewery Ltd., recently presented the cheque Mr. Spelliscy. Application for matching funds has already been made.□

J. Gordin Kaplan, 1922 - 1988

J. Gordin Kaplan, University Professor and our first Vice-President (Research), died peacefully at his home on 6 July.

Dr. Kaplan was an internationally acclaimed biochemist and an outspoken champion of the need for science policy and increased research funding in Canada, lobbying governments on behalf of researchers throughout the country.

In April of this year, his contributions to the research and academic community of Canada were recognized with the National Conference on University Research and the Future of Canada held in his honor. It was during that conference that David Suzuki, UBC zoologist and broadcaster, remarked, "Everything Gordin did was bigger than life. In talking with him an ordinary issue would become a discussion on life. He is outspoken for what he believes in and is fearless, a quality that academics are short in. Gordin is a role model for everyone in academia." At the same conference, President Myer

Gordin Kaplan

Horowitz commented that one "looks to Gordin for creative, imaginative thinking, pushing all of us. In Gordin we got someone who would shake us up, give a certain tone, certain style, certain color to the (then) new office of Vice-President (Research). I thank him."

Dr. Kaplan joined the University in July 1981 and although the majority of his time was devoted to the vice-presidency, he also maintained his research interests. The extensive list of his accomplishments at the University of Alberta includes the initiation of technology transfer activities (leading to the creation of the Office of Research Services), the founding of WISEST (Women in Scholarship, Engineering, Science and Technology) and the establishment of the Research Policy Committee and the Central Research Fund. Dr. Kaplan was also instrumental in introducing the Research Prize Awards, and was closely associated with UNDO (University Nuclear Disarmament Organization), the annual "Canada, the World and the Future" conference, and ECAT (Edmonton Council for Advanced Technology).

In 1987, Dr. Kaplan stepped down as Vice-President (Research) and continued his research and lecturing activities in his role as University Professor, an honor the University accorded him in that year.

A native of New York City, Gordin Kaplan received his baccalaureate from the College of the City of New York and his graduate degrees from Columbia University. He began his academic career at Dalhousie University and was Chair of the department of biology at the University of Ottawa before assuming the vice-presidency at the University of Alberta.

A celebration of his life and work will be held on campus in the near future. □

Telephone Registration

Continued from page one

The award, as the accompanying photo suggests, is a team award, with "players" and "coaches" coming from the Office of the Registrar, University Computing Systems, Budget and Statistics, the Department of Chemistry and the Faculty of Arts.

Sponsors of this the initial awards program are The Royal Bank, The Molson Companies, The Power Corporation of Canada and The Canadian Association of University Business Officers.

There were 31 submissions for the 1987 awards, which are intended "to stimulate and recognize outstanding achievements in improving management methods and business practices in Canadian universities."

From the you-can't-win department, Paul LeGrange, president of the Students' Union, recently told the Board of Governors that he and Registrar Brian Silzer are hearing complaints about telephone registration. The naysayers' stance is that the old style procedure used to take six hours and that the 10 minutes needed to register by phone doesn't give students a chance to stand in line and strike up friendships with other students. Those groans you hear are coming from Dr. Warrack and his colleagues. □

If the Cheque's in the (Overseas) Mail it Won't Get There Posthaste

At a university, there are tests and there are tests.

The people in Scheduled Distribution, concerned with the length of time it takes for U of A mail to reach overseas destinations, approached Canada Post which in turn put the service to a two-month test.

Some 500 letters, evenly distributed by the day of the week, were mailed by Scheduled Distribution to Amsterdam, London, Stockholm, Sydney, Tokyo and Zurich. (Scheduled Distribution provided envelopes and postage; all costs were refunded by Canada Post.)

The results were, in most instances, quite encouraging, say Barry Lofto and Mike Lupul. However, service to Australia is lagging—mail dispatched by Scheduled Distribution on

Mondays, Tuesdays or Wednesdays was delivered in eight days or less in almost all instances excepting Australia. Mail leaving campus on Thursdays or Fridays invariably took 10 or 11 days (reflecting the second weekend).

"Canada Post has assured us that they are discussing this with their counterparts in Australia and hope to see improvement in the future," says Mr. Lofto.

On average, it takes 10 days for mail to reach Sydney. Service to the other cities chosen for the test is as follows: Amsterdam, 7.5 days; London, 7.3 days; Stockholm, 9.5 days; Tokyo, 7.5 days; Zurich, 7.9 days.

All figures are in calendar days and include weekends and holidays. Any effect of time zones or date lines is excluded. □

Board of Governors

Continued from page one

Funding for final grading and pond installation at the Kurimoto Japanese Garden was announced. (Most of the money for the project emanates from private donations.)

The Governors endorsed the recommendation of the GFC Committee on Admissions and Transfer that the University of Alberta and North American Baptist College enter into an affiliation agreement for a three-year period (to June 1991) with a further review at that time.

NABC is located at 11525 23 Avenue, Edmonton. It was established in 1939 as the Christian Training Institute.

A proposal from the Faculty of Graduate Studies and Research for the establishment of an MSc program in psychiatry received the

go-ahead. No additional funding requirements are envisaged. The intent is that acceptance be limited to students who are capable of obtaining studentship funds or for whom funding is available on research grants.

David Magee and Guy Swinnerton have been appointed to lead the Department of Physical Therapy and the Department of Recreation and Leisure Studies, respectively. The term of each appointment is five years, effective 1 July 1988.

The University has provided garage space (May to August) for a Model T and a 1911 Cadillac owned by the Friends of Rutherford House. There's no greasing of palms here; the only condition is that President Horowitz and Chancellor Miller will be taken for a ride if they wish. □

High School Students Look at Non-traditional Fields, Thanks to WISEST

On campus for the next six weeks, three grade eleven boys will be learning about Home Economics and Nursing, while 23 girls from grade eleven are studying Science and Engineering.

They are all taking part in the fifth program sponsored by WISEST (Women In Scholarship, Engineering, Science and Technology) to encourage high school students to enter fields of study that traditionally attract few members of their sex.

Working in departments and labs under the supervision of University staff, the boys and girls will be treated to first-hand experience of

research in a University environment.

They'll also have a chance to meet men and women in non-traditional fields, talk to career counsellors, and become more aware of the range of opportunities open to anyone with an aptitude in math or science.

In the sciences, the girls have been assigned to Chemistry, Physics, Zoology, Microbiology and Computer Science. They'll also be found in Electrical, Mechanical, Chemical and Civil Engineering.

The boys are in Family Studies and Nursing. □

Memorial Organ Wins Hearts of Fraser Valley Community

Out of sight, out of mind. Until, that is, Gertie Pool of Matsqui, B.C., wrote *Folio*, saying, "We thought you might be interested in what happened to the historic Con Hall Casavant pipe organ which left Edmonton in November 1976."

It was known that Adrian De Jong of Abbotsford, B.C., purchased the organ that year and that Mr. De Jong and organ builder Adrian Koppejan of Chilliwack, B.C., dismantled the 11 1/2-ton organ and then watched the movers earn their pay by loading more than 10,000 pieces on to a truck and driving from Edmonton to De Jong's car port on Lilac Street.

A short while later, Pool informs us, De Jong sold 14 stops from the organ to a Christian Reformed Church in Surrey. In 1978, the Trinity Christian Reformed Church in Clearwater, in the first phase of a building program, bought the balance of the organ, Pool writes. De Jong and a number of volunteers installed seven ranks of the organ for temporary use until the church's new sanctuary was completed. Other parts were stored in the church basement.

The sanctuary was built in 1987 and Mr. Koppejan was hired to restore the intricate parts of the

vintage organ (it was built in 1919 by Casavant Frères Ltd. in St-Hyacinthe, Quebec).

"Mr. Koppejan studied organ building and tonal finishing in Stuttgart, West Germany, and helped build two of the largest pipe organs in Berlin and Nuremberg," Pool writes. "Since one of his favorite stops, the 'Sesquialter,' was missing, he manufactured his own for this organ. He re-voiced the organ to a classical-baroque

sound to suit the church sanctuary."

The instrument has 39 stops, 32 ranks, 2,098 pipes, 25 chimes, and six additional stops prepared for possible expansion. It is air operated, and requires a five-horsepower electrical motor to drive a blower that provides air pressure for the pipes.

The pipes range in diameter from that of a pencil to 16 inches, and in height from half-an-inch to 16 feet.

"The mechanical aspect of the console was in excellent shape and needed little repairs other than re-soldering over 4,000 connections," De Jong said.

Due to labor donated by church members, restoration and installation costs were halved.

Pool continues: "The attractively renovated organ opens new horizons for music lovers in the Fraser Valley. It is a feature attraction inviting enquiries from far and wide." □

Kanasewich Receives 1988 J. Tuzo Wilson Medal

The 1988 J. Tuzo Wilson medal has been awarded to Ernest Kanasewich by the Canadian Geophysical Union. The medal was presented by the president of the society, Petr Vanicek, at a banquet on 9 May during the annual meeting at the University of Saskatchewan. (The occasion was the inauguration of the CGU as a fully independent scientific body representing Canadian geophysicists).

The award, named in honor of Tuzo Wilson, Canada's most famous geophysicist and one of the originators of the theory of plate tectonics, is presented annually on

the basis of international stature and contribution to basic science.

Dr. Kanasewich is a professor of geophysics at our University. He was appointed in 1963 and has served as assistant and acting chairman of the Department of Physics. He has authored more than 80 scientific papers and served as a supervisor to 14 students who have obtained their MSc. Currently, he is supervising three PhD students and one MSc student.

He was elected a Fellow of the Royal Society of Canada in 1975 and given an Honorary Membership in the Canadian Society of Exploration Geophysicists in 1982.

A major contribution which was given special mention in the citation is his authorship of the book entitled *Time Sequence Analysis in Geophysics*. Now in its third edition, it has become a best seller from the books published by the University of Alberta Press. It is a widely used standard reference in

industry and a textbook for senior and graduate students at most geophysical departments. The book has also been translated into Russian and widely distributed in Eastern bloc countries.

His current research involves LITHOPROBE and seismic tomography. Together with D. Ian Gough, he was one of the initiators of project LITHOPROBE, a national geoscience program funded at \$25 million over five years. This is a study of the Lithosphere, the rigid, outermost 100 km of the earth whose dynamics control the geological development of the earth's crust. The program is funded by the Natural Sciences and Engineering Research Council and the Department of Energy, Mines and Resources. The major merit of examining the structure of the crust under project LITHOPROBE involves the seismic reflection method in a technique developed by Dr. Kanasewich, his scientific research associates and graduate students. □

Robert H. McNeal, 1930 - 1988

Robert Hatch McNeal, professor of Russian and Soviet history at the University of Massachusetts, Amherst, Massachusetts, died on 2 June, in an automobile accident in Medford Leas, New Jersey.

Robert McNeal was born in Newark, but grew up in Maplewood, New Jersey. He graduated from Yale University with an MA in 1952, and then continued his education at Columbia University where he earned his doctorate in Soviet history in 1958.

Before coming to the University of Alberta to join the faculty of the Department of History in 1958, he taught at Princeton for four years.

While at the U of A, first as assistant professor, later associate, Professor McNeal put much of his effort into building up the library collection in the field of Russian and Soviet history. He was also an ardent advocate for the establishment of a university press.

In 1962, Professor McNeal left the U of A for a position at McMaster University where he remained till 1964, moving from there to the University of Toronto

with the rank of full professor. In 1969, he returned to his native United States and was a member of the Department of History of the University of Massachusetts until his death.

An internationally known scholar in his chosen field, he published a number of monographs, including *The Bolshevik Tradition* (it went through three editions); the only available in English biography of Nadezhda Krupskaia, Lenin's wife, *The Bride of the Revolution: Krupskaia and Lenin; and Tsar and Cossack*. His latest work, *Stalin, Man and Ruler*, has just been published by Macmillan of London. In addition, Professor McNeal was the editor of nine other studies, and author of a number of translations. He contributed more than 100 articles and reviews to scholarly journals.

Above all, Robert H. McNeal was an inspiring teacher, and a man of the highest integrity and honesty. He will be missed by many.

He leaves his wife, Jacqueline (Frost), three sons, Andrew, Jeffrey and Peter, and a daughter, Martha. □

Department of Botany Much in Evidence at National Assembly

At the recent Canadian Botanical Association (CBA) meetings at the University of Victoria, the University of Alberta's Department of Botany was well represented by staff and students alike.

CBA's outgoing president, K.E. Denford, chairman of the department, presented the Lawson Award to Paul R. Gorham, professor emeritus and chairman of the department from 1971 to 1979. The award is given to the Canadian botanist who has contributed most significantly to science in Canada. Dr. Gorham was also the 1987 recipient of the Canadian Society of Plant Physiologists' (CSPP) Gold Medal for outstanding contributions to plant physiology.

The Cinq Mars Award for the

best student paper at the CBA meeting went to Elizabeth John whose topic was "Niche separation amongst co-existing species of the crustose lichen genus *Rhizocarpon*." Ms. John is currently a PhD student under the supervision of Mark R.T. Dale. She was also awarded a CBA Travel Bursary which will enable her to attend a professional meeting of her choice during this academic year.

In the CSPP competition, Sheila MacFie received honorable mention for her presentation titled "Relationship between tolerance to aluminum and manganese in spring wheat (*Triticum aestivum*). The paper was co-authored with her PhD supervisor, Gregory J. Taylor. □

Kuryliw Family's Donation Signals Growth of Ukrainian Folklore Studies

Wasyl and Anna Kuryliw of Sudbury, Ontario, were recently recognized by the University of Alberta for their donation of \$100,000 that, when matched by the Government of Alberta, will become a family foundation

ing \$300,000. The foundation will be used for graduate student scholarships and fellowships in Ukrainian Folklore Studies and Ethnography. The Kuryliw family have always held Ivan Franko, the eminent Ukrainian poet, writer and scholar, in high esteem and they have therefore decided to call their awards "Ivan Franko Scholarships and Fellowships."

Mr. Kuryliw thanked B. Medwidsky (Slavic and East European Studies) for "leading me to this institution" and thanked Canada "for giving me a chance when I was 17 1/2 years old, with only \$5 in my pocket, with no knowledge of the language, nothing at all."

Dave Russell, Minister of Advanced Education, said Mr.

Kuryliw's story is one of a man "who learned to weld (his career was with the International Nickel Company of Sudbury), learned to play the cello, learned to get involved in community activities ... and all he said was 'go'."

Bohdan Krawchenko, director of the Canadian Institute for Ukrainian Studies, called ethnography and folklore a "very neglected field of studies" but one that is coming back into vogue in North American universities. "Ethnography and folklore, one should add, is not just the study of old traditions and culture, or Easter eggs and that sort of thing. It is also a study of a contemporary situation, of what makes us unique as individuals," Dr. Krawchenko said.

In mentioning the development to associates ranging from the Institut de Culture in Quebec to the Institute for Contemporary Culture at the University of Birmingham, Dr. Krawchenko said "their mouths watered."

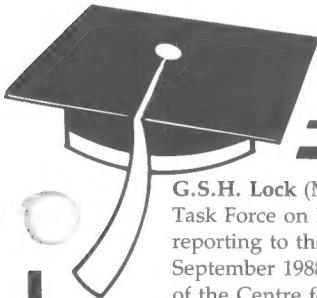

Wasyl and Anna Kuryliw were joined at the reception by their son and daughter-in-law, Mr. and Mrs. Ihor Kuryliw, and by three friends—I. Dziki, Y. Kalistochuk, and A. Shklar. Other guests included Deputy Premier and Minister of Advanced Education

Dave Russell, Chancellor Tevie Miller, President Myer Horowitz, and friends of the U of A's Endowment Fund for Ukrainian Folklore—Mary Lobay, Peter Savaryn, Julian Koziak and Bill Diachuk. □

Photo/U of A/Photo Services

Pictured (left to right) are: Dave Russell, Myer Horowitz, Anna and Wasyl Kuryliw, and Tevie Miller.

Activities

G.S.H. Lock (Mechanical Engineering) will chair a Task Force on Northern Science and Technology, reporting to the Science Council of Canada in September 1988 . . . Peter Adams, founding president of the Centre for Frontier Engineering Research, will take up the presidency of the Technical University of Nova Scotia (TUNS) early in 1989 . . . Still in the leadership vein, Jim Browne (Psychology) was named president and chairman of the board of the Alberta Division, Canadian Mental Health Association, at the division's annual conference held in Lethbridge, 10 to 12 June . . . The School of Native Studies recently honored scholarship recipients Lori Tootoosis (Adrian Hope Scholarship in Native Issues and Insights), Evelyn Cardinal (The Johnny Samson Scholarship in Native Studies), Jane Martin (The Tkachenko Prize in Native Studies for Introductory Cree), and Robert Lindsay (The Tkachenko Prize in Native Studies for Intermediate Cree) . . . Among Chatelaine's "outstanding women graduates" of 1988 is Lori Makarenko (BA Political Science). Following study in France, she hopes to work with the Government of Alberta and, later, in international affairs . . . Harry Wohlfarth (professor emeritus, Extension) was saluted by the Alberta Association of Community Art Clubs at that body's 20th anniversary celebrations in Red Deer, 5 June. The association also inaugurated a Harry Wohlfarth Scholarship in Drawing, to be awarded annually. To complete the triple, the Red Deer and District Museum is displaying his series of watercolors called "Arctic - North Pole Experience" . . . Norbert R. Morgenstern (Civil Engineering) has been elected a Fellow of the Canadian Academy of Engineering. The Academy was officially established in May 1987 during the celebration of the centennial of engineering as an organized profession in Canada. Election to Fellowship is based upon recognition of contributions to the advancement of engineering and to economic and social progress in Canada.

How do Women Interpret the Bible Differently?

Depends on which era you're talking about, says Patricia Demers, University of Alberta English professor. Religious women of the Middle Ages, even when they critiqued the scriptures, "wrote under the tutelage and guidance of male monastic counsellors." And women who wrote for children in the 18th and 19th centuries were even "more restrictive in their vision," says Dr. Demers, in that they "mined the Bible" for its teaching potential.

The critical edge is what sets the modern female view of the Bible apart from earlier periods in history, she argues. But that doesn't mean contemporary feminist Bible scholars look at the text as simply a "sexist manifesto" or a "tainted document of faith."

To leading feminist scholars like Mieke Bal and Julia Kristeva the Bible is an important cultural and literary artifact to be viewed from visionary and esthetic perspectives.

Contemporary feminist scholarship examines the commentaries on earlier, essentially patriarchal texts. "You don't have to read any further than Augustine" to catch that bias, says Dr. Demers. But there's a similar bias in the work of some

contemporary Biblical scholars, she adds.

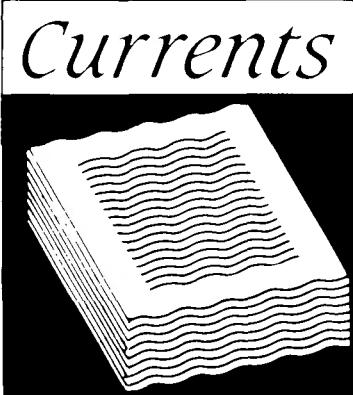

A scholar like Bal takes a revisionist view, particularly of famous Biblical love affairs, comments Dr. Demers. Bathsheba is no longer a seductress; David is haunted by sexual fears. Samson and Delilah? The strong man of that duo is in fact "characterized by immature sexuality."

Dr. Demers's association with the Bible dates back to childhood. Raised on the Douai-Rheims edition, she began studying the King James version as part of her university teaching. "It's a rich and puzzling text," she says. □

* Reprinted from Q and A, published by the University's Office of Public Affairs.

Correction

The date of the switchover to the new telephone system, Centrex III, is 28 January, not 20 January as was reported in the 30 June issue of Folio. □

Reception for Shirley Dean

Shirley Dean will retire on 31 August after 27 years of service at the University of Alberta. She was the Employee Relations Coordinator from 1980 to 1986 and most recently Personnel Services' Planning Coordinator.

An informal reception in her honor will be held on Friday, 12 August, from 3 to 5 p.m. in the Upper Lounge of the Faculty Club. Friends and colleagues are cordially invited to attend and extend their good wishes.

A gift will be presented to the Personnel Services and Staff Relations' Resource Centre in Shirley's name. Those wishing to make a donation towards this gift are invited to send contributions to Carol Burgess, Personnel Services and Staff Relations, 2-40 Assiniboia Hall. Please R.S.V.P. by 8 August to Carol Burgess, 432-5201.

Reception to Honor

A.T. (Al) Robertson

The Department of Planning and Development will hold a farewell reception in honor of Al Robertson. Mr. Robertson will retire on 1 September 1988 after 20 years of dedicated service to the University of Alberta.

A reception will be held from 3 to 6 p.m. on Thursday, 25 August, at the Faculty Club. Friends and colleagues are cordially invited to attend.

Those wishing to make a donation towards a farewell gift may forward a cheque payable to the "A.T. Robertson Retirement Fund".

Donations deadline: 19 August (c/o: Emma Molina (432-4966), Department of Planning and Development, 480 General Services Building).

Talks

Medicine

Until 28 August. "The Summer Show"—works by Barbara Tipton, Tom O'Flanagan and Franklyn Heisler.

Positions

The University of Alberta is an equal opportunity employer.

In accordance with Canadian Immigration requirements, these advertisements are directed to Canadian citizens and permanent residents.

Academic

Administrative and Professional Officer (Professional Liaison Officer/Practicum Supervisor), Recreation and Leisure Studies

Applications are invited for the position of Administrative and Professional Officer (Professional Liaison Officer/Practicum Supervisor).

The APO reports directly to the Chairman of the Department of Recreation and Leisure Studies, and through the Chairman to the Dean of the Faculty of Physical Education and Recreation. He/she is responsible for the development of practicum positions which cover a broad range of areas related to the Recreation and Leisure Studies field: the preparation of Professional Practicum students for completion of course requirements through formal class instruction and individual counselling; the ongoing monitoring of each student's progress in the work setting; the convening of formal seminars and the grading of assignments to enhance each student's learning; the ongoing development and maintenance of positive relationships between the department and Faculty and the public, private, and non-profit agencies with which the students are placed; and advising academic staff within the Faculty of Physical Education and Recreation regarding the establishment of work experience courses in their respective areas.

The position has an annual salary range of \$27,792 to \$41,688.

Qualified applicants must have an MA degree in Recreation and Leisure Studies or a related field and knowledge of, or experience with, professional agencies and organizations in the field. Experience with job placements and teaching at the university level would be a major asset.

Applications, including a résumé and the names of three references, should be forwarded to: Dr. G.S. Swinnerton, Chairman, Department of Recreation and Leisure Studies, E-401 Van Vliet Physical Education and Recreation Centre, University of Alberta, Edmonton, Alberta T6G 2H9.

The preferred date of appointment is 1 September 1988. The deadline for receipt of applications is 31 July 1988.

Annual Fund and Special Projects Manager

Applications are invited for the position of Manager, Annual Fund and Special Projects. The appointment is to be effective 1 September 1988.

Reporting to the Executive Director, the Manager is accountable for raising money from the private sector to further the mission of the University of Alberta through the management of the annual fund "Project Leadership" campaign and for the coordination of special projects as requested by the Executive Director.

Candidates should possess at least one post-secondary degree (or its equivalent) from a recognized institution. Experience within a university desirable. Salary range: \$30,454 to \$45,602 (under review).

Please submit your application by 5 August 1988 to: Hal L. Spelliscy, Executive Director, Development Office, 450 Athabasca Hall, University of Alberta, Edmonton, Alberta T6G 2E8. Applications close 6 August 1988.

Administrative and Professional Officer, Department of Zoology

Applications are invited for the position of Administrative and Professional Officer, Department of Zoology. The department is a large teaching and

research department in the Faculty of Science.

Duties include administrative assistance to the Chairman, budget responsibilities (operating, capital and trust), personnel management, timetabling, student counselling, and assistance to various departmental committees.

Qualifications include a university degree, and experience in budget management and personnel supervision.

This is an Administrative and Professional Officer position, reporting directly to the Chairman with salary commensurate with qualifications and experience—effective 1 July 1988. Current salary is \$32,090 to \$48,146.

The date of appointment is 25 July 1988. The deadline for receipt of applications is 20 July 1988.

Applications, including a résumé and the names of three referees, should be forwarded to: Dr. R.E. Peter, Chairman, Department of Zoology, University of Alberta, Edmonton, Alberta T6G 2E9.

Reference Librarian and Technical Services Librarian

The University of Alberta Library invites applications for two positions within the Humanities and Social Sciences Library.

The first position is a Reference/Collections Librarian. Reporting to the Public Services Coordinator, the incumbent will provide a full range of reference services and collections work, including on-line searching, bibliographic instruction, and responsibility for selection, faculty liaison, and collection fund management in a subject area. The successful candidate for this position will have an accredited degree in library science and one in a discipline within the humanities and social sciences. Knowledge of a second language is highly desirable, as is previous reference experience.

The second position will have an emphasis on Technical Services and Collection Management. Reporting to the HSS Collections Development Librarian, the incumbent will investigate and resolve technical/collections problems and may oversee some technical services and collection support functions. The incumbent will also provide collection development, liaison with faculty and reference services. The successful candidate for this position will have an accredited degree in library science and a degree in a discipline within the humanities and social sciences. Knowledge of one or more foreign languages is highly desirable, as is technical services/collection development experience.

The positions will be filled at the Librarian 1 or 2 level, with a current salary range of \$26,564 to \$41,988, depending on qualifications. Candidates should send a *curriculum vitae*, transcripts of academic record and the names of three references by 31 July 1988 to: Mr. J. Teskey, Personnel Officer, Cameron Library, University of Alberta, Edmonton, Alberta T6C 2J8.

Legal Programming Officer, Legal Resource Centre

The Legal Resource Centre, Faculty of Extension, invites applications from individuals interested in public legal education. This position involves designing, researching, teaching, and administering legal education programs of the Centre. Applicants must have an LLB degree. In addition, a BEd or teaching experience in adult programs would be desirable. Other experience may include public legal education activities, alternative legal services, and working with community organizations.

Salary will be commensurate with qualifications and experience, within the range of \$26,564 to \$38,564. Closing date

for receipt of applications: 6 August 1988. Applications and enquiries should be sent to: Ms. Lois Gander, Director, Legal Resource Centre, 10049 81 Avenue, Edmonton, Alberta T6E 1W7.

Resident Director, Shastri Indo-Canadian Institute

The Shastri Indo-Canadian Institute is currently seeking applications for the position of Resident Director (New Delhi, India) from well established Canadian academics who will be on study leave in 1989-90.

The Institute is a consortium of 21 universities, and the National Library of Canada, and offers a variety of programs such as the fellowship program for Canadian and Indian scholars and students, the program of providing books from India to Canadian member universities and books from Canada to Indian universities where Canadian studies are developing.

Workshops and conferences are held from time to time in Canada and in India.

The appointment will be made for a period of one year commencing 1 July 1989.

The complexity of the Institute's activities requires that the Resident Director be an established scholar with a research project in the social sciences or humanities focussing on India or on a Canada-India comparative topic. The Resident Director has overall responsibility for the Institute's existing operations in India, and is also expected to demonstrate initiative in developing new programs and in providing leadership.

The criteria to be used in the selection of the Resident Director are scholarship, administrative and representational abilities, and experience in India with equal weight being given to each. Other things being equal, preference will be given to applicants from member universities.

Scholars who are Canadian citizens or landed immigrants interested in being considered for the above position should reply in writing, including an updated *curriculum vitae* and a research proposal (which will be assessed by evaluators outside the Institute), not later than 10 October 1988. Communications should be addressed to: Executive Director, Shastri Indo-Canadian Institute, 2500 University Drive N.W., Calgary, Alberta T2N 1N4.

The University of Alberta is a member of the Shastri Indo-Canadian Institute, represented on campus by an elected committee. Faculty are encouraged to apply for the position. For further information, telephone Regula Qureshi (432-3908).

Support Staff

To obtain further information on the following positions, please contact Personnel Services and Staff Relations, 2-40 Assiniboia Hall, telephone 432-5201. Due to publication lead time and the fact that positions are filled on an ongoing basis, these vacancies cannot be guaranteed beyond 8 July. For a more up-to-date listing, please consult the weekly Employment Opportunities Bulletin and/or the postings in PSSR.
